# COORDINATION CHEMISTRY REVIEWS, VOL. 177 (1998)

## AUTHOR INDEX

Baerends, E.J., 97
Belser, P., 301
Brunschwig, B.S., 61

Creutz, C., 61

Daniel, C., 181
De Cola, L., 301

George, M.W., 201
Grätzel, M., 347

Guillaumont, D., 181

Hush, N.S., 37

Kalyanasundaram, K., 347
Kunkely, H., 81

Lees, A.J., 3

Reimers, J.R., 37
Rosa, A., 97

Stufkens, D.J., 127
Sutin, N., 61

Turner, J.J., 201

Vlček, A., Jr., 217, 219
Vogler, A., 81
von Zelewsky, A., 257

Ziegler, M., 257

PII: S0010-8545(98)00236-7

## SUBJECT INDEX

Bridging ligands
  Photoinduced energy and electron transfer processes in rigidly bridged dinuclear Ru/Os complexes 301
Calculation of rotational strength
  Charge-transfer excited state properties of chiral transition metal coordination compounds studied by chiroptical spectroscopy 257
Catecholates
  Charge-transfer excited state properties of chiral transition metal coordination compounds studied by chiroptical spectroscopy 257
Charge separation
  Photoinduced energy and electron transfer processes in rigidly bridged dinuclear Ru/Os complexes 301
Charge transfer
  Excited states of transition metal complexes studied by time-resolved infrared spectroscopy 201
  Organometallic complexes as luminescence probes in monitoring thermal and photochemical polymerizations 3
  Photoreactivity of metal-to-ligand charge transfer excited states 81
Charge-transfer transitions
  Electroabsorption spectroscopy of charge transfer states of transition metal complexes 61
Circular dichroism, CD
  Charge-transfer excited state properties of chiral transition metal coordination compounds studied by chiroptical spectroscopy 257
Circular polarized luminesence, CPL
  Charge-transfer excited state properties of chiral transition metal coordination compounds studied by chiroptical spectroscopy 257
Curing
  Organometallic complexes as luminescence probes in monitoring thermal and photochemical polymerizations 3

Cyclometallated complexes
Charge-transfer excited state properties of chiral transition metal coordination compounds studied by chiroptical spectroscopy 257
Density functional theory
Metal–CO photodissociation in transition metal complexes: The role of ligand-field and charge-transfer excited states in the photochemical dissociation of metal–ligand bonds 97
DFT
Charge-transfer excited state properties of chiral transition metal coordination compounds studied by chiroptical spectroscopy 257
Diimine complexes
Ligand-dependent excited state behaviour of Re(I) and Ru(II) carbonyl–diimine complexes 127
Dinuclear metal complexes
Photoinduced energy and electron transfer processes in rigidly bridged dinuclear Ru/Os complexes 301
Dipole-moment changes
Electroabsorption spectroscopy of charge transfer states of transition metal complexes 61
Electroabsorption spectroscopy
Electroabsorption spectroscopy of charge transfer states of transition metal complexes 61
Electronically excited states
Organometallic complexes as luminescence probes in monitoring thermal and photochemical polymerizations 3
Electronic coupling elements
Electroabsorption spectroscopy of charge transfer states of transition metal complexes 61
Electronic spectroscopy
Organometallic complexes as luminescence probes in monitoring thermal and photochemical polymerizations 3
Electron transfer
Photoinduced energy and electron transfer processes in rigidly bridged dinuclear Ru/Os complexes 301
Emission
Organometallic complexes as luminescence probes in monitoring thermal and photochemical polymerizations 3
Emission lifetime
Photoinduced energy and electron transfer processes in rigidly bridged dinuclear Ru/Os complexes 301
Energy transfer
Photoinduced energy and electron transfer processes in rigidly bridged dinuclear Ru/Os complexes 301
Excited state dynamics
Mechanistic roles of metal-to-ligand charge-transfer excited states in organometallic photochemistry 219
Excited-states
Photoinduced energy and electron transfer processes in rigidly bridged dinuclear Ru/Os complexes 301
Excited states
Metal–CO photodissociation in transition metal complexes: The role of ligand-field and charge-transfer excited states in the photochemical dissociation of metal–ligand bonds 97
Exciton theory
Charge-transfer excited state properties of chiral transition metal coordination compounds studied by chiroptical spectroscopy 257
Helical path rule
Charge-transfer excited state properties of chiral transition metal coordination compounds studied by chiroptical spectroscopy 257
Helicates
Charge-transfer excited state properties of chiral transition metal coordination compounds studied by chiroptical spectroscopy 257
Hydroxamates
Charge-transfer excited state properties of chiral transition metal coordination compounds studied by chiroptical spectroscopy 257
Luminescence
Organometallic complexes as luminescence probes in monitoring thermal and photochemical polymerizations 3
Mesoporous films
Applications of functionalized transition metal complexes in photonic and optoelectronic devices 347
Metal to ligand charge transfer
Solvent effects on metal to ligand charge transfer excitations 37

Metal-to-ligand-charge-transfer
A quantum chemical investigation of the metal-to-ligand-charge-transfer photochemistry 181
Metal-to-ligand charge-transfer
Mechanistic roles of metal-to-ligand charge-transfer excited states in organometallic photochemistry 219
MLCT, LMCT, MMCT
Charge-transfer excited state properties of chiral transition metal coordination compounds studied by chiroptical spectroscopy 257
MLCY states
Ligand-dependent excited state behaviour of Re(I) and Ru(II) carbonyl–diimine complexes 127
Molecular wires
Photoinduced energy and electron transfer processes in rigidly bridged dinuclear Ru/Os complexes 301
Mono- and di-metal complexes
Solvent effects on metal to ligand charge transfer excitations 37
Nanocrystalline oxides
Applications of functionalized transition metal complexes in photonic and optoelectronic devices 347
Optoelectronic
Applications of functionalized transition metal complexes in photonic and optoelectronic devices 347
Organometallics
Mechanistic roles of metal-to-ligand charge-transfer excited states in organometallic photochemistry 219
Osmium complexes
Photoinduced energy and electron transfer processes in rigidly bridged dinuclear Ru/Os complexes 301
Photochemistry
A quantum chemical investigation of the metal-to-ligand-charge-transfer photochemistry 181
Ligand-dependent excited state behaviour of Re(I) and Ru(II) carbonyl–diimine complexes 127
Mechanistic roles of metal-to-ligand charge-transfer excited states in organometallic photochemistry 219
Metal–CO photodissociation in transition metal complexes: The role of ligand-field and charge-transfer excited states in the photochemical dissociation of metal–ligand bonds 97
Photoreactivity of metal-to-ligand charge transfer excited states 81
Photonic
Applications of functionalized transition metal complexes in photonic and optoelectronic devices 347
Photophysical processes
Organometallic complexes as luminescence probes in monitoring thermal and photochemical polymerizations 3
Photophysics
Ligand-dependent excited state behaviour of Re(I) and Ru(II) carbonyl–diimine complexes 127
Photopolymers
Organometallic complexes as luminescence probes in monitoring thermal and photochemical polymerizations 3
Polymerization
Organometallic complexes as luminescence probes in monitoring thermal and photochemical polymerizations 3
Polymers
Organometallic complexes as luminescence probes in monitoring thermal and photochemical polymerizations 3
Polypyridine complexes
Applications of functionalized transition metal complexes in photonic and optoelectronic devices 347
Photoinduced energy and electron transfer processes in rigidly bridged dinuclear Ru/Os complexes 301
Quantum chemical calculations
A quantum chemical investigation of the metal-to-ligand-charge-transfer photochemistry 181
Rhenium
Ligand-dependent excited state behaviour of Re(I) and Ru(II) carbonyl–diimine complexes 127
Ruthenium
Applications of functionalized transition metal complexes in photonic and optoelectronic devices 347
Ligand-dependent excited state behaviour of Re(I) and Ru(II) carbonyl–diimine complexes 127
Ruthenium complexes
Photoinduced energy and electron transfer processes in rigidly bridged dinuclear Ru/Os complexes 301

Solar cells
Applications of functionalized transition metal complexes in photonic and optoelectronic devices 347
Solvent reorganization energies
Electroabsorption spectroscopy of charge transfer states of transition metal complexes 61
Solvent shift
Solvent effects on metal to ligand charge transfer excitations 37
$\sigma\pi^*$ states
Ligand-dependent excited state behaviour of Re(I) and Ru(II) carbonyl–diimine complexes 127
Thermosetting polymers
Organometallic complexes as luminescence probes in monitoring thermal and photochemical polymerizations 3
Thin films
Organometallic complexes as luminescence probes in monitoring thermal and photochemical polymerizations 3
Time-resolved infrared spectroscopy
Excited states of transition metal complexes studied by time-resolved infrared spectroscopy 201
Transition metal
Excited states of transition metal complexes studied by time-resolved infrared spectroscopy 201
Transition metal complex
Photoreactivity of metal-to-ligand charge transfer excited states 81
Transition metal complexes
Electroabsorption spectroscopy of charge transfer states of transition metal complexes 61
Transition metal organometallic compounds
Organometallic complexes as luminescence probes in monitoring thermal and photochemical polymerizations 3
Tris(diimine) complexes
Charge-transfer excited state properties of chiral transition metal coordination compounds studied by chiroptical spectroscopy 257
